

# VpCI<sup>®</sup>-329 D

# **PRODUCT DESCRIPTION**

VpCl<sup>®</sup>-329 D is a ready-to-use oil-based rust preventive. VpCl<sup>®</sup>-329 D provides excellent protection to metals in indoor and outdoor sheltered conditions. VpCl<sup>®</sup>-329 D protects in two unique ways. First, oil-soluble corrosion inhibitors offer a tenacious film which clings to metal surfaces, providing excellent contact corrosion protection. In addition to this film barrier, VpCl<sup>®</sup>-329 D releases vapor phase corrosion inhibitors into the air that attach electrochemically to the metal surface.

VpCl<sup>®</sup>-329 D is great for protecting metal parts that require a light coat of oil for further processing and shipment; such as gears, spindles, coils, or any other metal part that uses oil for corrosion protection.

VpCI<sup>®</sup>-329 D is available in an easy to spray (ES) version, its carrier utilizes bio-based oil.
